

Driving Operational Excellence Through Safety, Sustainability and Compliance in Evolving Manufacturing Environments

DANA DAWSEY, CSP

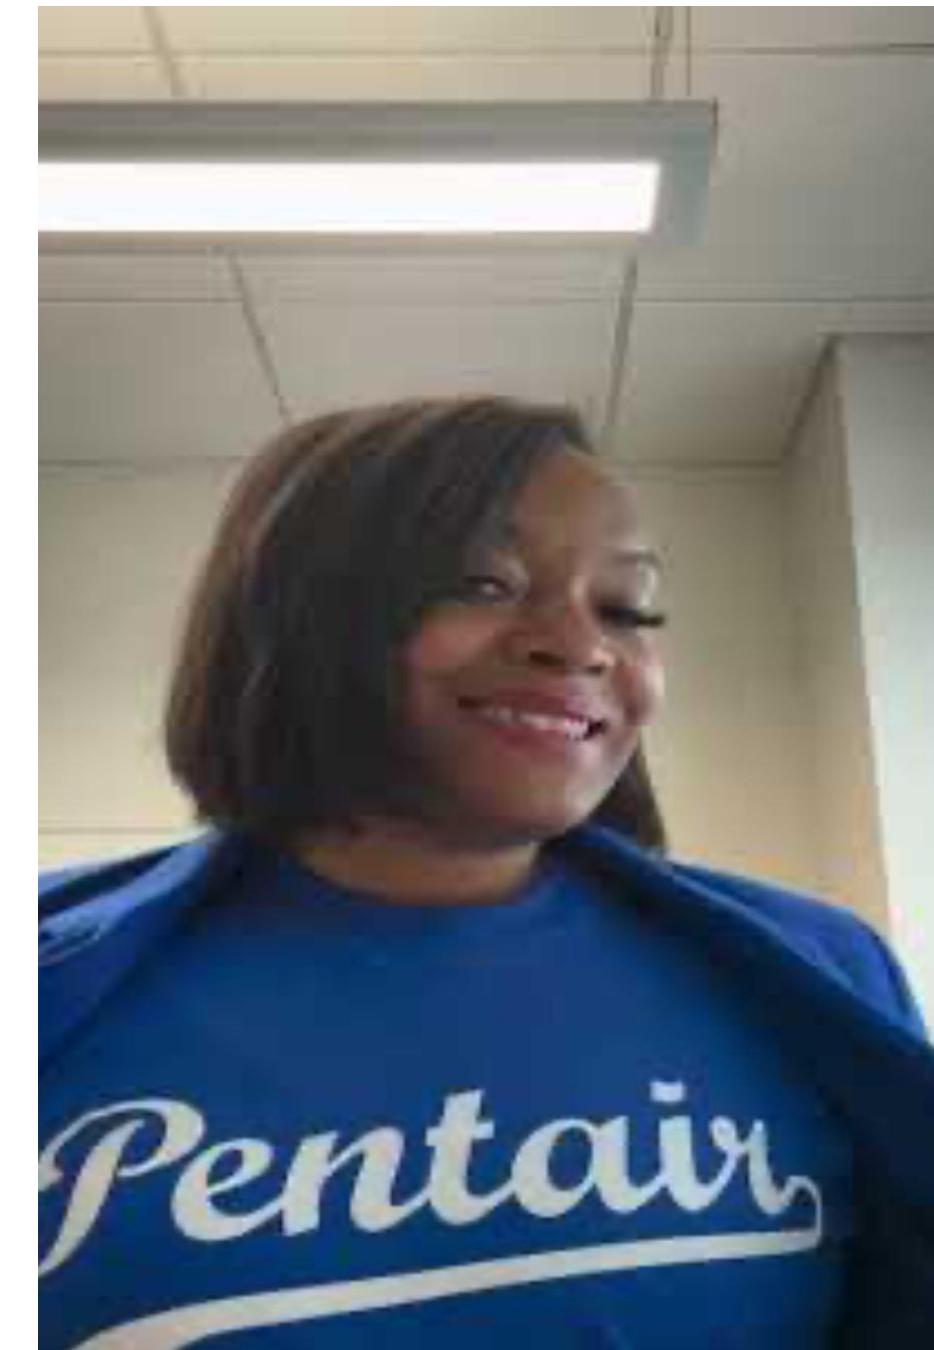

PENTAIR GLOBAL VICE PRESIDENT

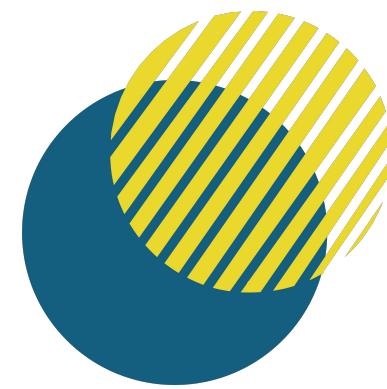

Transformation Journey

“When I stepped into my role at Pentair, one thing was clear: safety, sustainability, and operational excellence are not three separate efforts—they are one system. And when one improves, they all improve.”

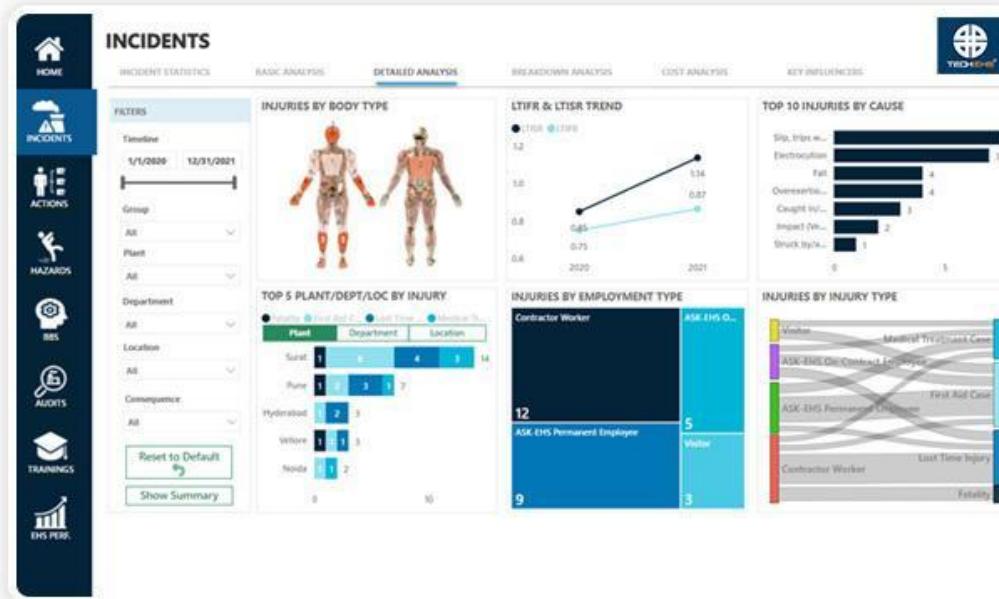

Embedding EHS strategy

into core operations to enhance performance, culture, and business outcomes

Operational Performance

Culture & Behavior

Culture & Behavior

Business Value

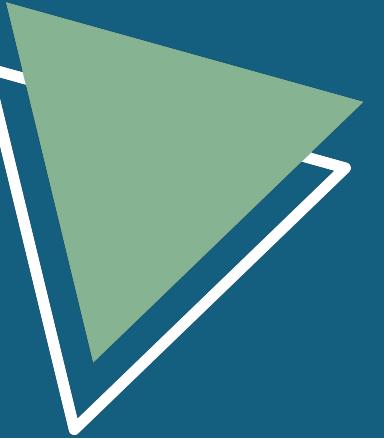

- Standardization
- Leading Indicators
- Risk Reduction

- Leadership Ownership
- Engagement
- Accountability

- Reliability
- Sustainability
- Compliance Excellence

Once the foundation is embedded, the next step is building high-impact programs.

Building High-Impact Safety Programs

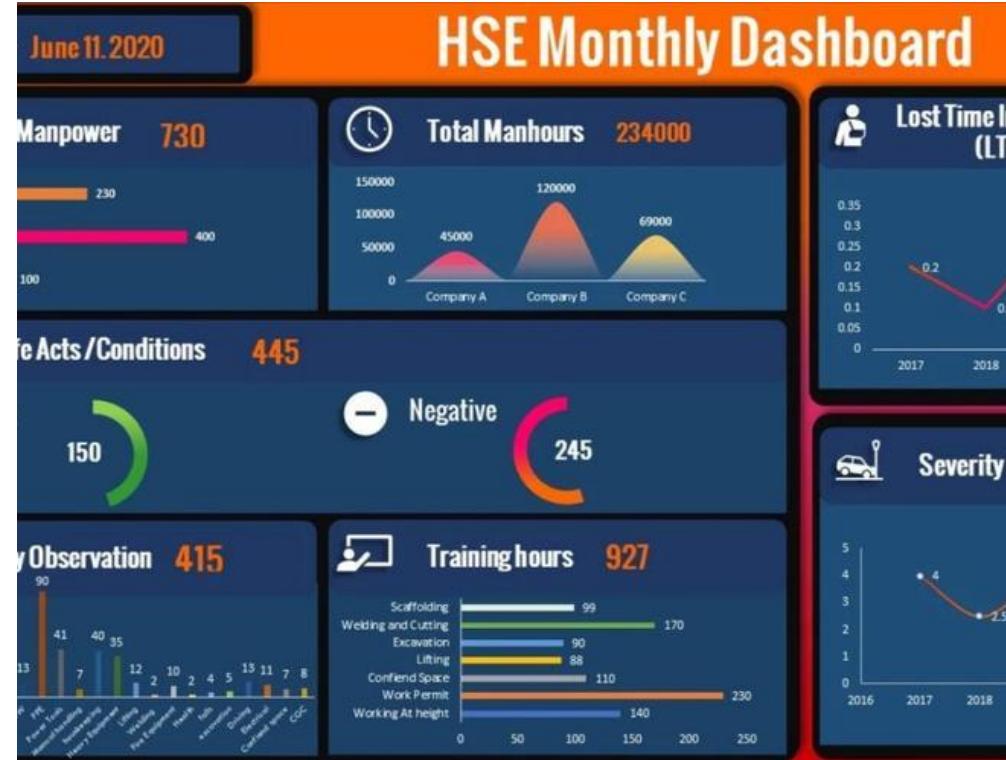

that reduce incidents and drive accountability across all levels

Relentless Leadership Ownership

Culture, credibility, and accountability start at the top.

High-Quality Leading Indicators That Drive Action

Enables proactive risk reduction
vs. reactive incident response.

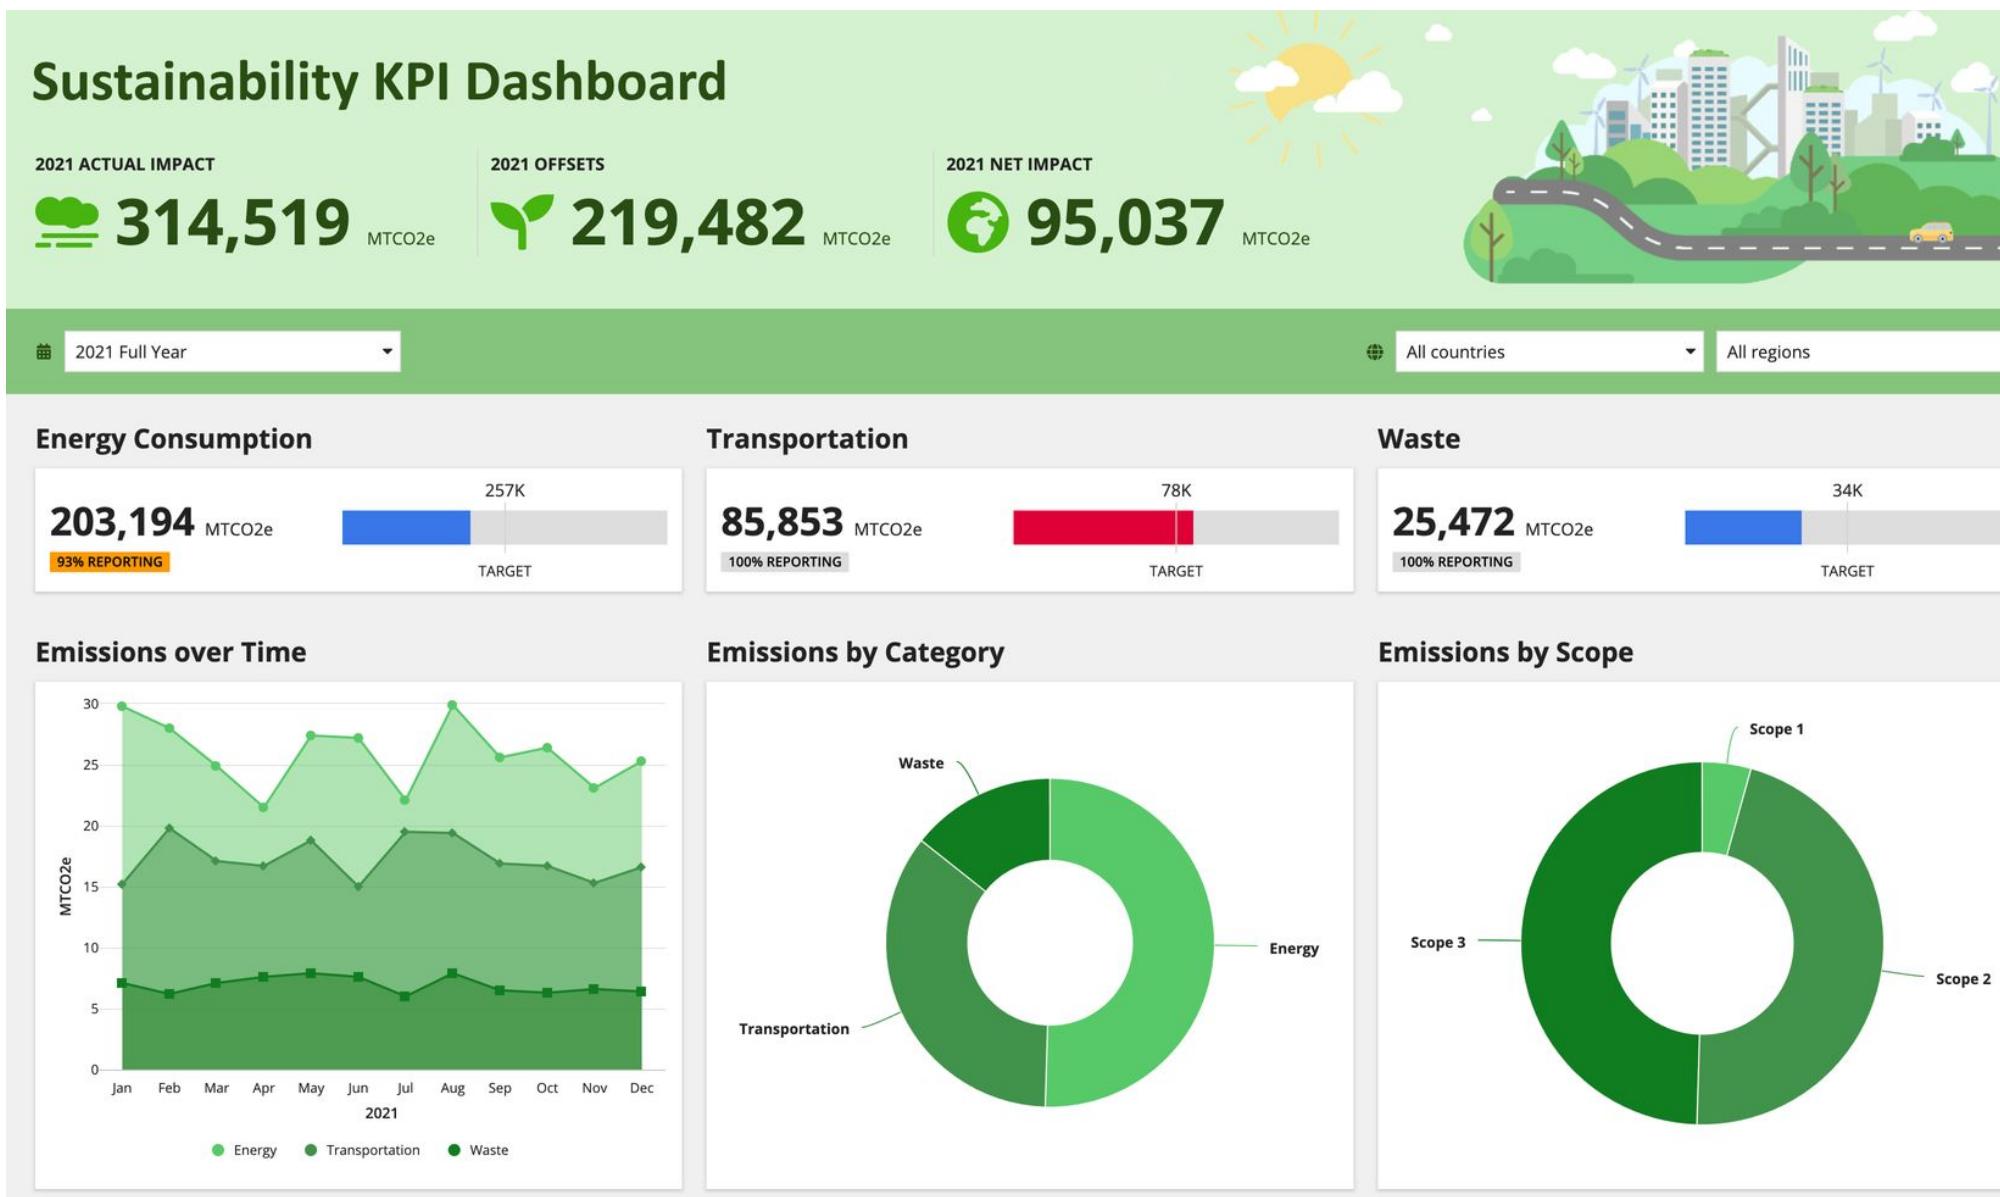

Integration of EHS Into Core Operations

Creates consistency, alignment, and sustainable performance improvement.

But programs alone don't drive sustainability—environmental alignment does.

Aligning Environmental Goals with Business Strategy to improve sustainability and regulatory compliance

Environmental Strategy Is Integrated Into Core Business Planning

Sustainability Targets Are Quantified, ROI-Driven, and Tied to Operational Performance

Proactive, Predictive Compliance Systems Reduce Risk and Strengthen Reliability

Even with strategy and sustainability in place, culture determines success.

Cultivating a Safety-First Mindset

through leadership coaching, engagement, and cross-functional collaboration

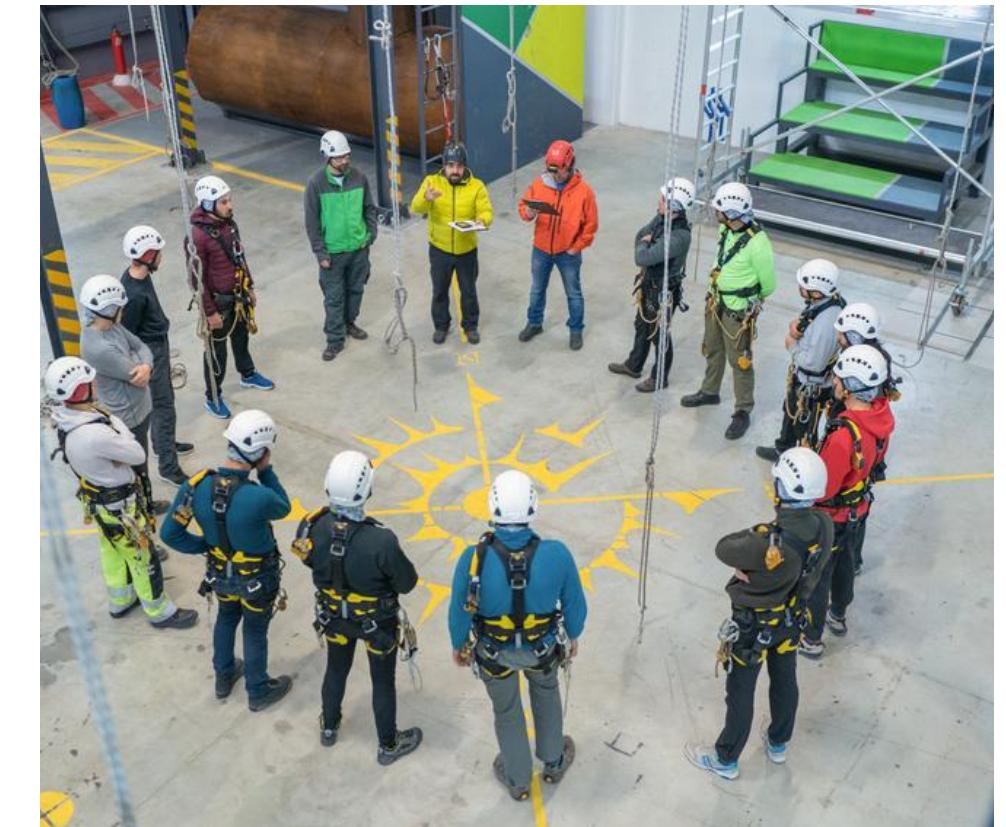

Safety Mindset Starts With Leadership Coaching

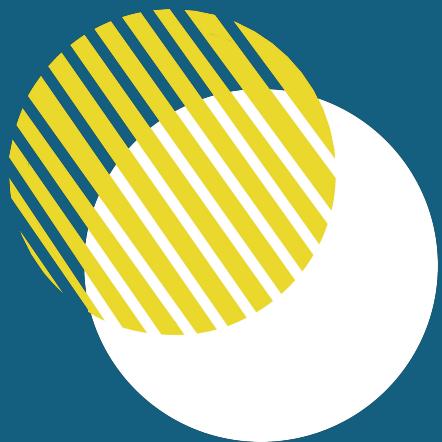

Engagement Turns Compliance Into Ownership

Culture Changes Through Daily Habits

But mindset alone won't eliminate risk; we also need structured, disciplined processes

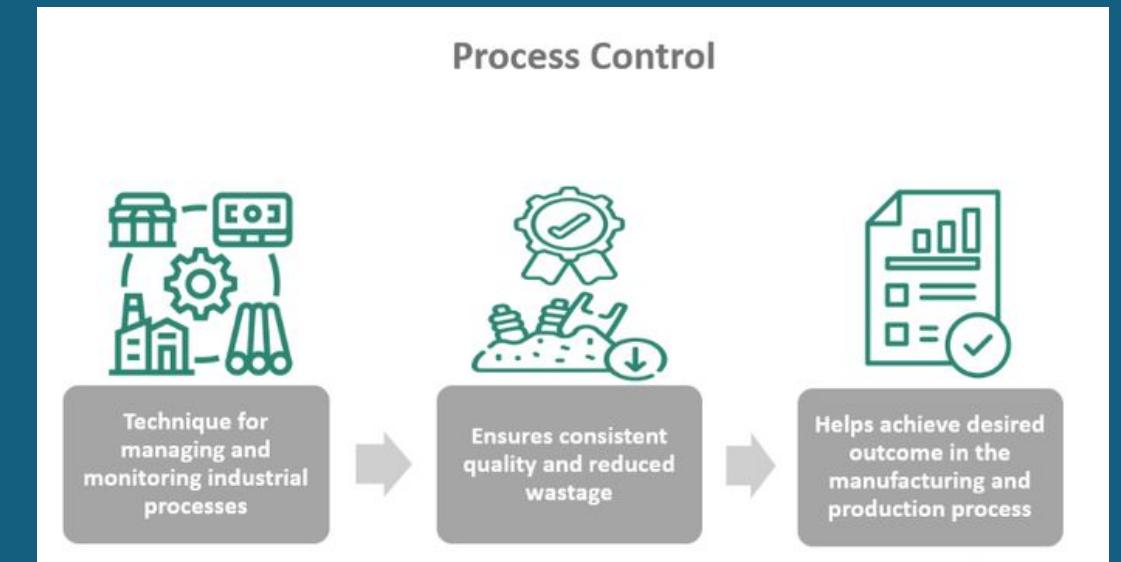

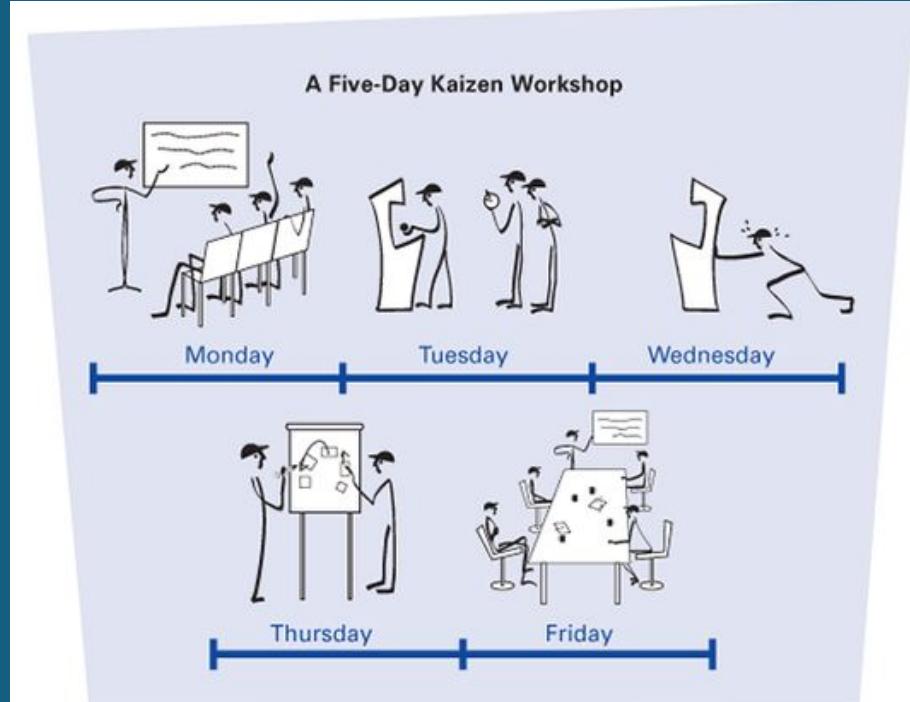

Leveraging Six Sigma and Continuous Improvement to eliminate risk and streamline EHS processes

Six Sigma & Process Improvement Tools

Cross-Functional Continuous Improvement Teams

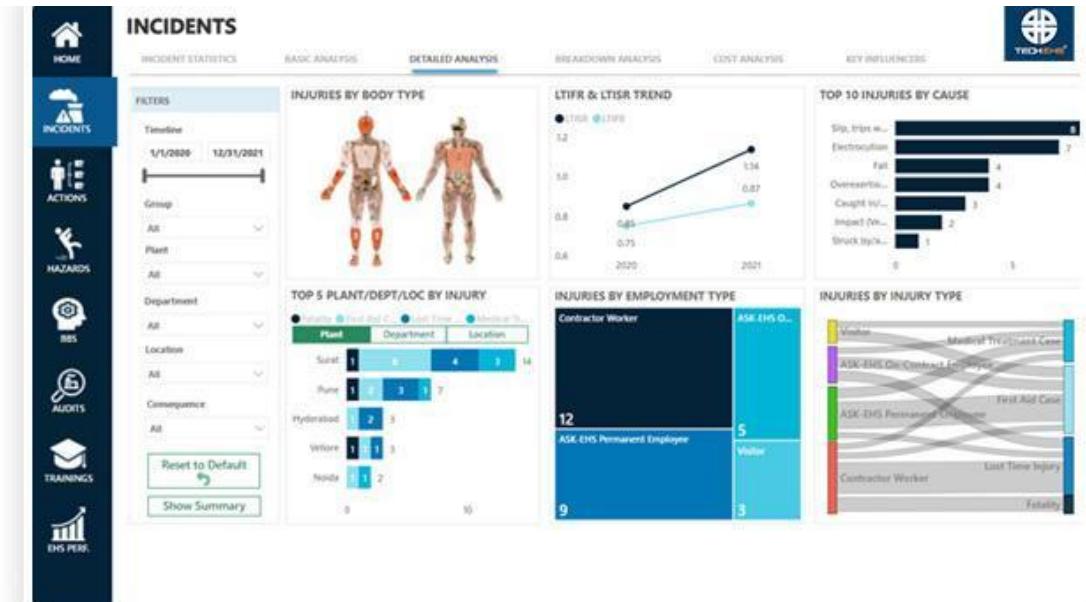

Streamlined EHS Processes

And once culture and processes are aligned, the next opportunity is acceleration.

Staying ahead of emerging EHS

Trends and Technologies to future-proof your safety and compliance model

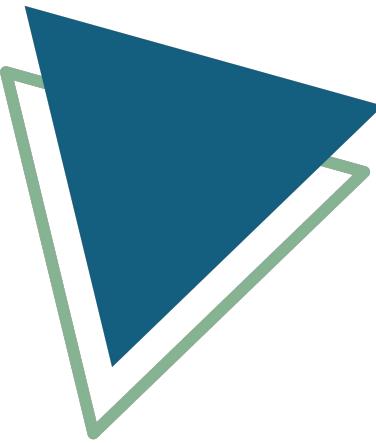

**Predictive Analytics & Real-Time
EHS Dashboards**

**Wearable Technology & Smart
PPE for Exposure & Fatigue
Monitoring**

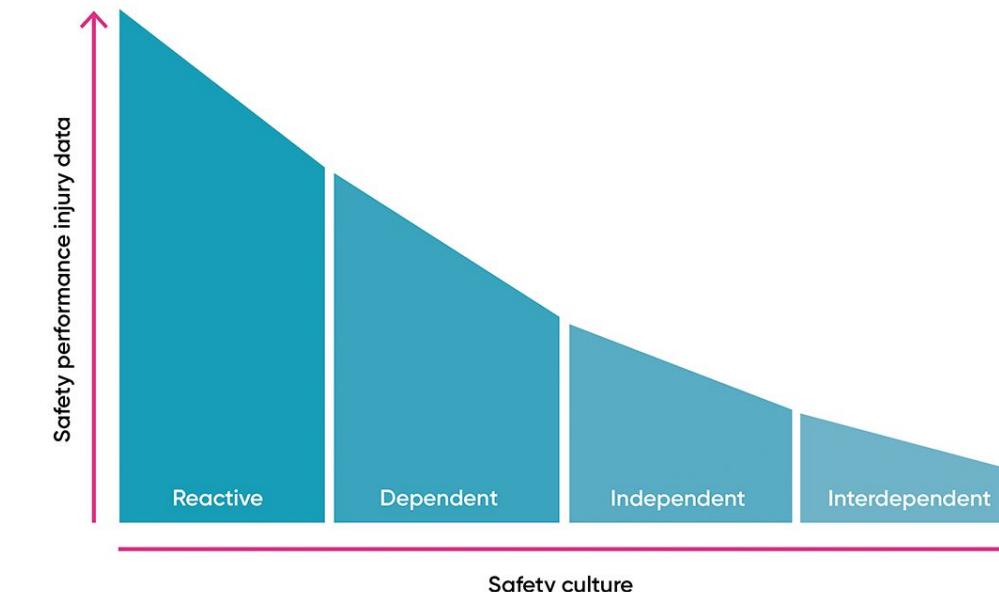

**Digital Process Safety &
Compliance Automation
Systems**

The true test of any strategy is results. And at Pentair, applying these principles has delivered measurable improvement in safety, culture, and environmental performance.

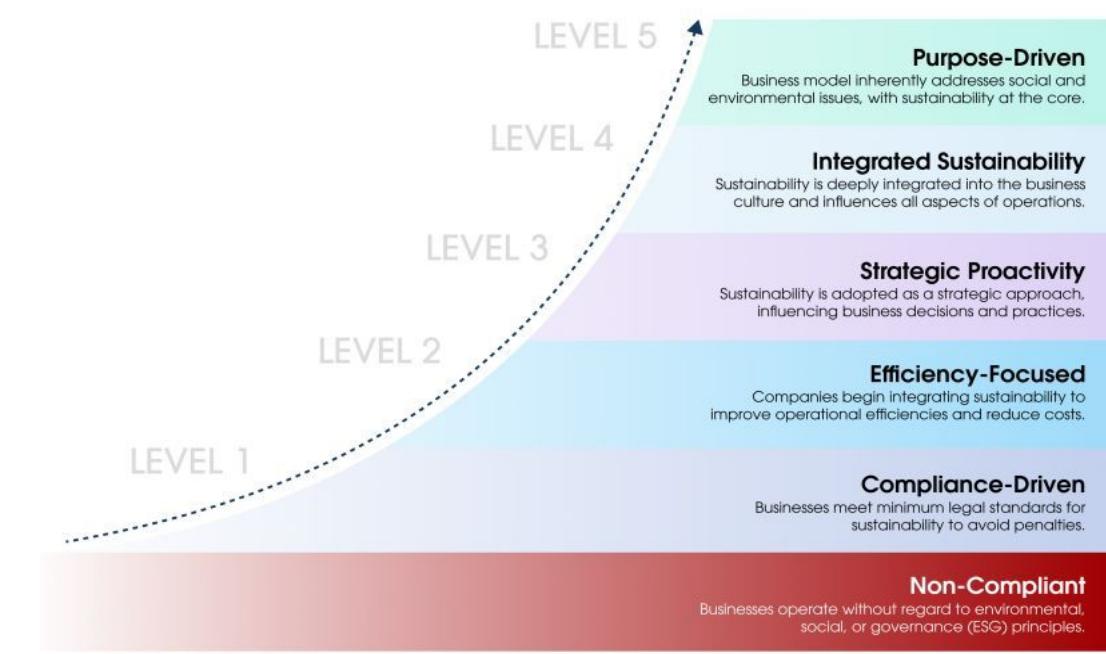

IMPACT ON EHS Performance

KPI Category	2023	2024	2025 YTD
IFR / TRIR Trend	🔴 Higher	🟡 Moderate	🟢 Lower
Near-Miss Quality	🟡 Medium	🟢 Strong	🟢 Strong
Leadership Engagement	🟡 Moderate	🟢 Strong	🟢 Strong
Environmental Compliance Health	🔴 Gaps	🟡 Controlled	🟢 Predictive

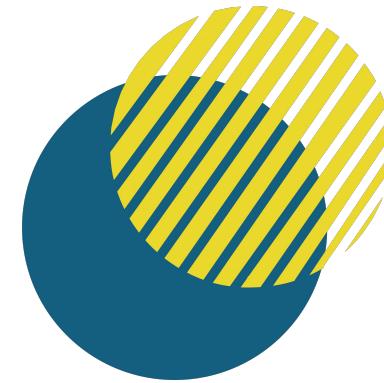

5 LEVELS OF SUSTAINABILITY MATURITY

- Incident Rate ↓ 30%
- Near-Miss Quality ↑ 40%
- Engagement ↑ 50%
- Environmental Exceedances ↓ 70%

TAKEAWAYS

- 1 Take One Principle Back to Your Organization — and Embed It.**

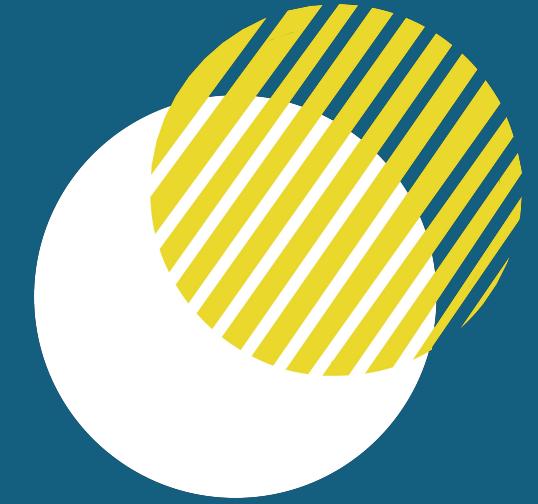

- 2 Build Cross-Functional Ownership for Safety & Environmental Performance.**

- 3 Commit to Becoming a Proactive Organization — Not a Reactive One.**

“Operational Excellence is not a destination — it’s a discipline. And every leader in this room has the power to ignite it.”

Thank You
