

American Automotive Summit 2017

November 28-29 | Detroit, MI

Still using Excel to schedule your production facility?

Do you experience any of these problems?

- **Continuous Churn**
 - Constantly changing schedule?
 - Juggling product priorities?
 - Managing variation of demand volume?
- **Limited Visibility**
 - When will orders be completed?
- **Constant Expediting**
 - Long status meetings?
 - "Hidden factory" (expeditor workforce)?
- **Out of Date Technology**
 - Outdated routers & paper travelers?
 - Status of each task/operation?

nMetric[®] Smarter Scheduling[™] technology embraces constant change of complex, high-mix environments by introducing real-time, dynamic scheduling. We intelligently handle disruptions and exceptions, enabling your organization to optimize scheduling efforts, regain visibility to order status, and deliver better business outcomes.

Contact nMetric[®] today for a demonstration!
