

The Industrial Cloud is Here. Are You Prepared for the Cybersecurity and Interoperability Challenges?

Q&A with WaterFall Security

In May 2019, Waterfall Security will join IT executives and industry leaders to discuss current trends, strategic insights and best practices in trending technology, cyber-security, risk management and managing talent at the American CIO & IT Summit.

On May 29, Waterfall will present on the topic, The Industrial Cloud is Here. Are you Prepared for the Cybersecurity and Interoperability Challenges? Their session will focus on use cases and best practices of companies in the critical infrastructure space who have overcome the cybersecurity and interoperability problem when adopting industrial cloud/IIoT.

Ahead of the American CIO & IT Summit, Generis Group spoke with Waterfall to discuss their session, what challenges companies face from cyber attacks, what steps companies need to take to leverage Waterfall Security's solutions and why companies choose to work with Waterfall.

.....

What challenges do companies face in securing industrial control systems from cyber attacks?

For industrial companies, reliability of the operation is the number one priority (opposed to data breach for non-industrial organizations) . There are many examples where cyber attacks have had a significant effect on an organization, but with proper planning and strategies, we can leverage the gains associated with the industrial cloud while minimizing the exposure to risk.

What steps do companies need to take to leverage Waterfall Security's solutions?

It all starts with a conversation. No two facilities are the same, and we will make sure that every organization get the proper solution for their needs.

Why do companies choose to work with Waterfall Security? What makes your company unique?

Our customers choose Waterfall for many reasons. Many choose us because of our experience: We have been protecting cyber-physical systems for 15 years. Others come to us because of our leadership in the industrial cybersecurity space. However, it is our vision that constantly attracts people. We are the global leaders in industrial automation cybersecurity, and we continue to innovate based on the needs of our customers and partners.
